

QiJACK MONO (TS)

QiJACK STEREO (TRS)

QiJACK is like no other jack on the market. It's built like a tank and engineered to sound the best. The secret is in our *patented rings* which expand into an oval shape

to provide a consistent grip. And with up to six contact points on the plug, it substantially reduces resistance to give you the best possible sound.

QiJACK for OEM is typically shipped in bulk, however, single product packaging is available for resale. Contact us for more information.

BUILD WITH QiJACK

Are you a builder, designer, or manufacturer of electronic musical instruments, amplifiers, pro audio or other equipment that requires the highest quality and best sounding jacks for 1/4" plugs?

If so, QiJACK by Analysis Plus may be the very best solution for your products. And with our new **Built w/QiJACK** OEM program, we give you the technical support and marketing tools to promote your high-end components. When you display the *Built w/QiJACK* badge, your customers will know they're getting the very best.

**BUILT W/
QiJACK**

THE DIFFERENCE

What makes QiJACK stand out from any other jack on the market? It's completely different than the 60 year-old design of the others. QiJACK's expandable rings out-perform the old style jack no matter how many bent springs they attach.

With QiJACK by Analysis Plus, you get:

- Solid, secure connection with no wobble. It never moves and lasts longer.
- Up to six points of contact, two for each tip, ring and sleeve.
- Curved contact points that literally hug the surface of the plug.
- Lower resistance and improved signal-to-noise ratio for better sound.
- Extraordinary construction. Made in the USA.

THE ANALYSIS PLUS COMMITMENT

Founded in 1992, Analysis Plus is a highly respected scientific research and design company focused primarily on two markets: Music/Pro Audio and high-end Home Audio.

In the Music and Pro Audio market, the company is known for their innovative, patented products that are preferred by musicians and technicians around the world who demand the very best in quality and sound.

Our commitment to providing both the highest quality products and best customer support is our number one priority. Your success and sound satisfaction is always our goal.
